

Mr Sajjad Ahmad

MBBS, FRCOphth, PhD
GMC 4409012

Consultant Ophthalmic Surgeon - Cornea & External Eye Diseases,
Cataract & Refractive Surgery

Mr Sajjad Ahmad is a Consultant Ophthalmic Surgeon with a special interest in managing diseases of the front of the eye: cornea, cataract and refractive, and external eye diseases (for example dry eye disease and allergic eye disease).

NHS Consultant Post

Consultant Ophthalmic Surgeon, Moorfields Eye Hospital, appointed 2016.

Professional memberships

Royal College of Ophthalmologists (UK), European Society for Cataract and Refractive Surgeons, Association for Research in Vision and Ophthalmology and International Society for Stem Cell Research.

Medical Education, Ophthalmology Training and Research

Mr Ahmad qualified from Newcastle University Medical School in 1997. Having completed his physician training, he undertook Ophthalmology training in Newcastle Upon Tyne before taking time out to do a PhD in stem cell biology at the Institute of Human Genetics.

He went on to undertake specialist corneal fellowships at St Paul's Eye Unit (Liverpool) and Moorfield's Eye Hospital (London). The mix of research and clinical experience has been vital to translate some of his laboratory research findings into the treatment of debilitating eye diseases of the cornea, including developing a technique to grow stem cells from the surface of the cornea to successfully treat patients blinded by burns and other diseases affecting the surface of the eye. Mr Ahmad is currently the UK chief investigator for a new European clinical trial for these corneal stem cells.
