

TCA Acid Peel

Treatment for xanthelasma, facial melasmas & fine wrinkles

All patients will see a doctor for their initial assessment prior to undergoing any treatment.

Unless otherwise specified, all treatment will be carried out by the consulting doctor.

Trichloroacetic (TCA) Acid Peel at Clinica London is used at 25-50% strength, most commonly 35%. If required, it can be used in combination with blepharoplasty surgery.

Consultation	Cost
