Light, Medium and Deep refers to the level of hydration needed to achieve best results on your hands and your face. Older, more dehydrated skin will require a Deep treatment regime whilst younger patients may only require a Light regime.

Skinboosters treatment is particularly effective around the lower face and mouth and helps hydration and fine lines. It is our star treatment for peri-oral rejuvenation. Around the eyes requires lighter treatment than around the mouth or hands.

Once the initial 3 treatments have been performed, maintenance of results can be achieved with a re-treatment approximately every six months of either 1ml or 2mls.

Where the skin is very dehydrated, 6 sessions are recommended.
